

### BLOCKING

1. Cut horizontally, 4" into the log, along the whole circumference
2. Cut diagonals, four sides
3. Cut diagonals at stem corners.

### SHAPING the STEM

1. "Shave" the stem with a slight curving of the cut.
2. Cut grooves into the underside of the cap, stopping short of the outer edge, to allow for undercutting of the cap.

### SHAPING the CAP

- Invert the "shroom and secure to carving base.
1. Undercut the cap one inch.
  2. "Block" the cap at a 45 degree angle, max. 4" in and 4" down.
  3. Shave round as desired.
