

This stylized mushroom was shared on the “Yellow” Forum by Mark Mahorney (woodzwayz).

This is a great level two quick carve. Very popular as a garden ornament they sell very quickly.

1. Carve the stem first, upside down.
2. Carve it squared, then octagon before rounding.
3. Carve the gills starting on the inside and work at perpendiculars (getting wider) to the outside.
4. Invert the log and square, octagon, then round the top
5. Sand or wire wheel for texture before staining.

Sculpted mushroom “patterned” by chainsawcarve.ca with the artist’s consent (Mark Mahorney).
